

Quick and simple all in one place

Accurate on-farm antibiotic usage record

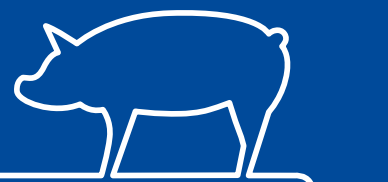

A website for all UK pig producers

- Enables the industry to record more accurate total on-farm antibiotic usage data
- Provides an electronic version of the existing paper medicine book
- Can be used to collate the antibiotic usage data required by Red Tractor assurance, avoiding duplication of effort

Access using AHDB Pig Hub and eAML2 login details at www.pighub.org.uk

The increased concern over antibiotic resistance in both humans and livestock means the pig industry needs to put itself in a more informed position on its overall usage.

It is a convenient way to record on-farm usage so producers can review and optimise their antibiotic use and help reduce production costs.

**Reduce your
antibiotic
usage while
maintaining
health and
welfare**
