Examples of screens available in WinPig.net

The main program window:

The main program window features a menu bar with options: General, Progeny, Sows/boars, General entries, Report, Management, Breeding, Analysis, Window, and Help. Below the menu bar are five shortcut icons for frequently used reports: Actionlist, Herd analysis, Fertility chart, Checklist, and Farm list. The center of the window displays the AgroSoft logo with the tagline "Activates your Knowledge". Below the logo are three buttons: Choose herd, Administration, and Setup. At the bottom, there are three shortcut icons for internet support: Support, Web backup, and Homepage.

Menu options

Shortcut icons for frequently used reports

Shortcut icons for frequently used setup options

Shortcut icons for internet support, sending a web backup and visiting the AgroSoft website

Data entry screens:

The Farrowing screen shows a table with columns: Animal number, Litter no, Event date, Live born, Still born, Mummified, and Transferred piglets. A filter line is used to search within the data.

The Service screen shows a table with columns: Event date, Animal number, Boar, Employee, Initials, No of matings, and Artificial insemination. A filter line is used to search within the data.

The Progeny transfer screen shows a table with columns: Event date, From location, To location, No. of pigs, Average kg, Total kg, Total, and Average. Weights and prices can be entered as either a total or an average, and the other column will auto-fill with the correct figure.

The Progeny slaughter screen shows a table with columns: Event date, Location, No. of pigs, Total kg, Average kg, Total, Average, Correlation factor, Total, Average, Per kg, and Probe. Weights and prices can be entered as either a total or an average, and the other column will auto-fill with the correct figure.

The filter line can be used to search for animals, dates or certain events.

Layouts allow each user to have their own setup of columns in the order they wish for data input.

Weights and prices can be entered as either a total or an average and then the other column will auto-fill with the correct figure.
