Notes: Data from Kantar Worldpanel is released for 4-week periods. Figures above relate to the 52-week period closest to each calendar year. The methodology used to compile figures is periodically reviewed by Kantar. Figures from recent years are reworked but not those for earlier years. Therefore, data for years before 2012 are not directly comparable with those from 2012 onwards. However, the figures should still provide a reliable indication of overall trends.
